Michael

YOU COULD BE THEIR CURE

Meet Michael and Ella. They need your help.

Jeanette and Mike learned that their precious baby, Michael, was diagnosed with a life-threatening auto immune disease called severe combined immunodeficiency disorder a.k.a. SCID or "the bubble boy disease" at just one week old.

Right now his only chance for a cure is a blood stem cell/bone marrow transplant.

Ella is an honors student who plays the violin, dances ballet, tap, lyrical and jazz, is a Girl Scout with Troop 855, loves to read, and is loved incredibly by her many friends, family, teachers and fellow cancer patients at Hasbro.

Ella is battling leukemia for the second time and needs a blood stem cell/bone marrow transplant.
